Md. Niamul Hossain

CAREER OBJECTIVE

I am an experienced **IT Support Specialist and Web Developer**. I solve Windows-related issues such as installation, boot errors, BSOD, driver conflicts, system slowdowns, data recovery, and network configuration. Alongside, I build modern, SEO-friendly web applications using **JavaScript, Next.js, Redux-Toolkit, React.js, and Tailwind CSS**. I have delivered projects on **Upwork** including e-commerce platforms, admin dashboards, and performance-optimized websites. My combined expertise in **system support** and **web development** allows me to provide reliable, high-quality solutions for clients.

EDUCATION

2020 – 2024 **B.S.C., in Computer Science & Engineering.**
NORTHERN UNIVERSITY OF BANGLADESH

2017 – 2019 **Higher Secondary Certificate**
Chatmohar Govt. College, Chatmohar, Pabna

WORK EXPERIENCE

I Web Development & Freelance Projects (Upwork & Personal Work)

- Successfully completed multiple projects on **Upwork** related to web development and system support
- Hands-on experience in **JavaScript, Next.js, Redux Toolkit, and Tailwind CSS**
- Built and optimized SEO-friendly websites ensuring faster performance and better ranking
- Developed and maintained full-stack projects with modern web technologies
- Worked on **bug fixing, performance optimization, and UI/UX improvements** for client projects
- Collaborated with international clients, ensuring timely delivery and high-quality results

Project

1. Personal Portfolio (2024)

Technologies: JavaScript (ES6), HTML5, CSS3, Tailwind

Developed a responsive personal portfolio to showcase academic background, skills, qualifications, education, training, and professional experience with a clean and user-friendly interface.

[GitHub](#), [Livelink](#).

2. Amol Tracker (2025)

Technologies: Vite, React.js, TypeScript, JavaScript (ES6), Tailwind CSS, HTML5, CSS3

Developed a modern and fully responsive web application using React and TypeScript, powered by Vite for fast development and optimized builds. Implemented reusable and accessible UI components with shading/Ui and designed a clean, scalable interface using Tailwind CSS. Focused on type safety, performance, and maintainable frontend architecture.

[GitHub](#): [Live](#):

3. Swift Parcel (2025)

Technologies: React.js, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS, React Hook Form, Zod, Radix UI, Sonner / SweetAlert2

Developed a scalable and modern frontend application using React and TypeScript with efficient global state management and API handling through Redux Toolkit and RTK Query. Implemented robust form handling and schema-based validation using React Hook Form and Zod. Built accessible and reusable UI components with Radix UI, and integrated user-friendly notifications using Sonner and SweetAlert2 for improved user experience.

[GitHub](#): [Live](#):

4. [Rest-Countries \(2026\)](#)

Technologies: React.js, JavaScript (ES6), Vite, HTML5, CSS3, Tailwind CSS

Developed a frontend web application using React and Vite as the project scaffold that focuses on building a responsive user interface with modern tooling. Leveraged React for component-based architecture, Tailwind CSS for utility-first styling, and optimized bundling with Vite for fast development and production builds. The application integrates interactive UI elements and adheres to best practices in responsive and scalable frontend development.

Skills

Web Development Skills

- **Frontend Development:** JavaScript, Next.js, React.js, Redux Toolkit, Tailwind CSS, TypeScript, React Hook Form, Zod, Radix UI, Sonner / SweetAlert2, Next.js, node.js, REST APIs & Git & GitHub.
- **SEO Optimization:** Building SEO-friendly websites with optimized performance, metadata, and indexing strategies
- **UI/UX Enhancement:** Designing user-friendly interfaces, fixing design bugs, and improving responsiveness
- **Web Performance:** Page speed optimization, clean code practices, and debugging errors
- **Project Experience:**
 - Completed multiple **Upwork projects** in Next.js & Redux Toolkit
 - Worked on full e-commerce frontends and admin dashboards
 - Delivered bug fixes, feature implementations, and performance tuning for client projects

Technical Support & Windows OS Skills

- Installing & configuring Windows (XP, 7, 10, 11)
- Fixing boot errors, BSOD, startup problems
- Troubleshooting driver conflicts & software compatibility issues
- Partition management, data recovery, formatting
- Virus & malware removal, registry cleanup, performance optimization
- Network troubleshooting (Wi-Fi, LAN, IP, DNS configuration)
- Installing essential updates, security patches, and software packages
- Helping users with Windows daily problems & UI/UX support

PROBLEM SOLVING

I have solved hundreds of algorithmic and data structure problems on platforms like **URI**, **Electrode**, **Code forces**, **Hacker Rank**, and **UVa**. I regularly participate in online programming contests to improve my logical thinking and **problem-solving skills**. Additionally, I have taken part in several on-site and intra-university contests, including those organized by the **NUB Programming Club**.

AFFILIATION

2022-Present General member at **NUB Programming Club**.

COURSES

- Web Development at Programming Hero (90% Marks avg.)
- App development With Jubayeer
- Web Dev.- Learn-With-Summit

2/2 LANGUAGE PROFICIENCY

Bengali Native Proficiency
English Intermediate
